AIRLINE FATALITIES TREND

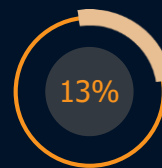

COMPARISON WITH AUTO

When we compare the fatalities between the air travel and auto travel, we can see the difference in number of fatalities.

We can also see the big decline when it comes to air line travel, fatalities declined by 51% where as auto fatalities have not seen such a decline proving the air travel got much safer over recent years.

Airline

Auto

742

Average annual
fatalities due to airline
travel (from 2010 -
2020)

34,903

Average annual
fatalities due to
road/auto travel (from
2010 - 2018)

AIR TRAVEL IS INFACIT VERY SAFE COMPARED TO OTHER MEANS OF TRANSPORTATION
